## Meeting of Durability and Design, Your solution partner in Boxes and Cartons...

One of the most important components of box and parcel production is corrugated cardboard. As a matter of fact, the boxes and parcels we make from corrugated cardboard are the most common packaging material used to reflect perfection with their design and durability. Corrugated cardboards are necessary not only for transportation, but also for protecting and selling products, and they are one of the suitable alternatives you can use highlight your brand. For instance, while the shoe box is used to both carry and store the product, the pizza box uses microcorrugated material to fold easily and be resistant to heat and moisture.

Single Face Board	F Flute	0,9 - 1,2 mm
	E Flute	1,2 - 2,0 mm
	B Flute	2,4 - 3,0 mm
Single Wall Board	C Flute	3,5 - 4,0 mm
